ABOUT US

We are pleased to introduce Master Technovision as a leading enterprise communication solution provider grounded in Dubai, UAE. We specialize in installing all types of SMATV/IPTV Satellite Systems, CCTV, Audio Video Intercom, Access control / Time Attendance, and Gate barrier systems. Our valuable clientele includes bluechip corporations, education institutions, and worship places. The well tailored solutions from Master Technovision are sound enough to meet the demands of the latest AV scenario.

CORE VALUES

Service

Value

Integrity

Trust

Excellence

VISION

To be a competitive and unequaled quality value provider in the field of Electronic Security and surveillance services. To partner with international suppliers and provide the latest technology and services.

MISSION

To be accredited as the most dependable, affordable, and customer focused technology provide and to be the best preferred technological partner of our customers.

CCTV

CCTV Installation, Testing & commissioning is the core service of our business. Our business model is purely based on customer satisfaction and our dedicated CCTV support will be just a call away at any time.

You can ensure the theft prevention, safety, and security of your staff, customers & visitors by installing CCTV systems and monitoring the movement of your shops and businesses.

SMATV

With SMATV system (Satellite Master Antenna Television), you can become your own in-house cable company. SMATV systems make use of multiple satellite and broadcast signals to create a single cable signal for dis-tribution to a cable company.

The installed satellite dish and TV antennae receive programming from satellite providers and local broadcast networks. The antennae feed into electronic equipment and a single cable signal is derived. This feed can be used on campus tv stations, information and billboard channels, live campus events, and so on.

AUDIO/ VIDEO INTERCOM

The audio and video entry security phones are very convenient for the verification & identification of people requesting entry. Our range of services includes many unique advantages with a wide variety of colours, digital entrance panels, and shapes of push button. Monitors can be supplied with monochrome or colour vision and image memory. Residential, as well as commercial purpose AV intercoms, are available.

TIME ATTENDANCE SYSTEM

Access the capability to control and monitor the authorized and unauthorized access of staff, visitors, and trespassers with the help of time attendance system. Access control systems can be easily integrated with CCTV systems, door entry systems, fire systems, etc. MTV provides leading edge electronics to security management systems working on an enterprisewide network with entry level, single door access control systems to protect offices and workplaces.

PARKING GATE BARRIER

Barrier gates are the ideal solution if you need to control vehicle transit in parking areas or entrances. A parking gate barrier system mainly consists of an electric motor. It supplies the power to open and close the gate automatically. The gate can be closed in a variety of ways such as by pushing the transmitter button or by closing automatically after a certain period of time.

We specialize in the supply, installation, testing, commissioning & maintenance of :

- Gate Barriers
- Dock Levelers
- Parking Management Systems
- Automatic Doors
- Roller shutters
- Remote Controlled Garage Doors
- Sectional Overhead Doors
- Glass doors
- All types of access control systems & solutions

WIFI / NETWORKING SOLUTIONS

Everything You Need to Get Started... Your business networking solution will enable data transfer and storage, it will enable any work on computers, will connect you to cloud tooling, and will allow even simple businesses processes like accepting credit cards.

Advanced networks that use strategic design, more access points, and better equipment to create reliable web connectivity for business users.

PBX / TELEPHONE STRUCTURED CABLING

A multi-line phone system used in a professional environment. For enterprises and small businesses alike, this has grown to include more advanced features for managing phone calls and modern communications solutions. More specifically, IP (internet protocol) technology has expanded the possibilities of phone systems. This includes integration with other business software.

PUBLIC ADDRESS /BGM SYSTEM

Our wide range of Public Addressing systems are often used in small venues such as school auditoriums, churches, and small bars. PA systems with many speakers are widely used to make announcements in public, institutional and commercial buildings and locations.

BGM system is meant to be a plug and play solution for any type of venue that requires Background Music to liven up and create ambiance in the room.

ANNUAL MAINTENANCE CONTRACT

We offer AMC contracts to resolve any technical issue and support in:

- SMATV
- CCTV
- GATE BARRIER
- INTERCOM

We are well equipped with an excellent and well educated team of engineers and technicians for system installation and maintenance.
